

I usually use tools like Jira or Azure Devops, but since I don't have personal access to them, they follow the bug report format that I assemble on the management platforms.

Rapporteur's name: Bruno

E-mail address: bruno.rcontato@gmail.com

Report Date: 06/23/2023

Bug info:

Security flaw: Application during several login attempts does not generate captcha

Bug Description:

When trying to log in to the application it is not generating captcha after a certain number of errors. In addition to not having an option to remember the user's password.

Steps to Reproduce the Bug:

- Access the application
- Entering an incorrect username or password
- Click on Log in
- Repeat the process several times

Expected behavior:

Generate a captcha to prevent intrusions.

System Environment: Dev

Operating System: Windows

Browser: Chrome
